Kevin Guido Urbina

Software Engineer | Full Stack Developer (Java, Spring Boot & React)

62953267 | guidourbinakevin@gmail.com | LinkedIn | Portfolio

Professional Profile

Software Engineer with 2 years of experience developing and maintaining production-grade web applications using Java, Spring Boot, React, TypeScript, and SQL. Strong understanding of modern web application architecture, RESTful APIs, relational databases, authentication, routing, and application performance optimization. Experienced in troubleshooting complex issues, improving software reliability, and developing maintainable, testable solutions using SOLID principles and clean architecture. Familiar with Docker, AWS, GitHub Actions, and CI/CD workflows. Proactive problem-solver committed to continuous learning, code quality, and effective collaboration within Agile development teams.

Professional Experience

Full Stack Developer | Universidad de Costa Rica

- Designed, developed, tested, deployed, and maintained production web applications throughout the software development lifecycle (SDLC).
- Developed RESTful APIs and backend services using Java and Spring Boot to support frontend applications and microservices-based architectures.
- Built reusable, responsive user interfaces using React, JavaScript, TypeScript, React Router, React Hook Form, and Tailwind CSS.
- Implemented secure authentication and authorization using JWT and Spring Security.
- Investigated and resolved frontend, backend, API, and database issues, contributing to a 30% reduction in reported failures.
- Optimized application performance, reducing loading times by approximately 25%, and improved data access using SQL and relational databases.
- Used Docker and GitHub Actions to support application containerization, automated workflows, testing, and deployment processes.
- Collaborated through pull requests, code reviews, and technical discussions, applying SOLID principles and clean architecture to improve code quality and maintainability.

Frontend Developer Intern | Centauro Solutions

- Developed responsive single-page applications using React, JavaScript, TypeScript, HTML5, CSS3, and Tailwind CSS.
- Implemented frontend features based on functional requirements, collaborating with designers and developers to deliver effective user experiences.

- Participated in Agile development workflows using Git, Git Flow, pull requests, and code reviews.
- Investigated and resolved user interface issues through debugging and systematic troubleshooting.
- Improved application usability and responsiveness through performance-focused frontend development.

Education

UCR | Bachelor's Degree in Computer Science and Multimedia Technology 2026
Liceo Pacífico Sur | International Baccalaureate Diploma and High School Diploma 2022

Skills

Technical Skills

Java • Spring Boot • JavaScript • TypeScript • React • RESTful APIs • Microservices • SQL • PostgreSQL • Relational Databases • Authentication & Authorization • Spring Security • JWT • React Router • React Hook Form • Tailwind CSS • Docker • AWS • GitHub Actions • CI/CD • Git • Git Flow • Object-Oriented Programming • SOLID Principles • Clean Architecture • Software Testing • Debugging & Troubleshooting • Performance Optimization • AI-Assisted Development • Agile • SDLC

Soft Skills

Problem Solving • Analytical Thinking • Adaptability • Continuous Learning • Effective Communication • Teamwork • Proactive Mindset

Cursos y Certificaciones

Microsoft Certified | Azure Fundamentals (AZ-900) | July 2026

Universidad de Costa Rica | Introducción a Docker | March 2024

AWS Academy AWS | Academy Cloud Foundations | August 2023
